ADAM POMPOSELLI

Student

19 Y.O.

PRESENTATION

I've been fascinated by web and video game development since I was a teenager, and I began programming at the age of 13 and have steadily improved my skill set over the years. I'm a development enthusiast who enjoys learning new things, meeting new passionate developers, and teaching what i've learned over the years.

The majority of people would follow the "normal" route, but I choose not to. I've always been a self-taught person, and it's gotten me great success in life. I can code, play piano at a high level, and have a remarkable physique just at age 19. There aren't many people that are as committed as I am. I'm not one that brag about his accomplishments, but because I took the dangerous step of discontinuing my education, I feel obligated to prove to you that I'm the greatest candidate for the position.

Hiring me is undoubtedly a risk, but I can assure you that you will not be disappointed.

Thanks for your time,
Kind Regards.
